## About Elephants Graveyard

Elephant's Graveyard, written by George Brant, is a powerful and haunting play that brings to life the true story of the tragic events surrounding the 1916 public execution of Mary, a circus elephant, in a small town in Tennessee. The play masterfully intertwines the voices of the town's residents and circus performers, exploring themes of guilt, mob mentality, and the human craving for spectacle. Through its unique blend of fact and myth, Elephant's Graveyard shines a light on the darker aspects of human nature, inviting audiences to reflect on the consequences of collective actions. This emotionally charged and thought-provoking production challenges us to consider how far society will go to satisfy its own sense of justice.
